

Bantam Burial Sled

Bantam is an extensively equipped modular towed sled, designed to bury cable from the inter-tidal zone. Operating from either a shallow draft vessel or barge, Bantam is capable of simultaneous lay and burial, or post lay burial, to a depth of 2.2m. Instrumentation includes burial depth rating, pitch and roll measurement, and two cameras.

Key Features

- Simultaneous lay and burial or post lay burial
- Variable cable burial depth
- Control system - remote pilot console
- Instrumentation includes burial depth, pitch and roll, two cameras and lights

Depth rating:	Within diver limitations
Weight:	5.8 tonnes (in air)
Length:	5.7m
Width:	4.0m
Height:	2.0m
Burial depth:	Up to 2.2 m
Burial speed:	Dependent on seabed conditions
Seabed type:	From very soft mud through to soft clays and stiff sands
