

Rocksaw Trencher

Rocksaw is a unique rock-trenching tool designed to operate from our specialist cable installation barges. The system is driven by a 2400HP hydraulic power pack, and is capable of excavation in a wide range of bedrock types in excess of 60MPa. Rocksaw is capable of burial to a depth of 4m in rock, and operating in depths within diver limitations.

Key Features

- Deep trencher for seabed rock
- High volume water jetting system enables removal of overburden
- Maintenance, including chain adjustment and pick changing, can be carried out by divers
- Chain length for up to 4m trench

Depth rating:	Within diver limitations
Weight:	45.5 tonnes
Length:	4m
Width:	3m
Height:	5m
Burial depth:	Up to 4m in rock
Burial speed:	Dependent on seabed conditions
Seabed type:	Coral, chalk, sandstone & limestone

All performance figures quoted are nominal, actual performance is dependent on environmental conditions prevailing at the time of operations.
